Introduction to the React Challenges
React, created by Facebook, is an open-source JavaScript library for building user interfaces. It is used to create components, handle state and props, utilize event listeners and certain life cycle methods to update data as it changes.
React combines HTML with JavaScript functionality to create its own markup language, JSX. This section will introduce you to all of these concepts and how to implement them for use with your own projects.

Summary

An Expert Talk on "Coding Path"

By Paresh Kale

on 21 May, 2021 at Time: 0230 PM.

42 Students from Godavari Foundation's Godavari College of Engineering Jalgaon participated in the talk.

The expert Mr Paresh Kale shared different Computer Languages available to choose for their Career. He highlighted that JAVA, Python, SQL, Oracle technologies are trending in the industry,

Outcome

1. Students gathered information on specific language domain career path
2. Students could distinguish between different computer Languages and their option available
3. Student cross examined with speaker about different coding path for Career

Program Coordinator Prof Ganesh Chavan
