6.5.1_1 Summary

6.5.1: Internal Quality Assurance System

As per the guidelines of AICTE and NAAC, an Internal Quality Assurance Cell (IQAC) has been established to pursue the institute's action plan for performance evaluation, assessment, accreditation, and quality improvement of the institution. The prime task of the IQAC is to develop a system for conscious, consistent, and catalytic improvement in the overall performance of the institution. IQAC has significantly contributed to improving the academic environment, teaching and learning processes, curriculum and evaluation methods, and research environment in the institution, in addition to ensuring coordination among various activities of the institution. The faculty coordinators continuously update information and furnish the same to IQAC at the institution level. The teaching-learning process is reviewed in each semester for improved outcomes in internal and external exams, student feedback, placements, etc. The institute communicates its quality assurance policies, mechanisms, and outcomes to all the stakeholders through various means of communication. The institute level Academic Advisory Committee conducts the departmental inspection periodically to assess syllabus coverage, faculty files, attendance registers, work load distribution, and student feedback and assessment reports. Academic auditing is a provision for internal review of the academic process. The internal quality assurance system is aligned with the requirements of external quality assurance agencies in all aspects of the institute's operation, with a focus on the quality of the teaching and learning process. Periodic meetings are conducted with class teachers, class representatives, and faculty members to review the teaching and learning process. Subject allocation is done as per the faculty's specializations and experience. Faculty are required to prepare lesson plans, a course file, personal notes, and a question bank before the commencement of the semester. The attendance register is maintained by each faculty and contains the students' attendance, performance in tests, and syllabus completion status. This is reviewed monthly by the respective head. The institute's IQAC has devised an effective and vibrant student feedback mechanism. To ensure close monitoring and effective teaching and learning, IQAC schedules and executes mid-term and end-term feedback. The Dean (Academics) conducts a regular review of the teaching and learning process with input from all departments. Based on the recommendations, critical observations and issues are escalated to the concerned Head of the Department for necessary corrective measures. To keep abreast of the latest trends and technologies and to bridge the gap, IQAC interacts with Training and Placement Cell coordinators. The identified gaps are communicated to the concerned head. concerned department facilitates and motivates the students to pursue the curated courses that are mentored by the faculties from the department. Faculties are also facilitated and encouraged to pursue AICTE ATAL, NPTEL, and SWAYAM's FDP. IQAC motivates to enhance research aptitude, which is showcased through research publications in journals of repute and noteworthy changes in the count of PhD registrations. Consistently effective measures of the IQAC can be substantiated by the significant enhancement in overall placement and various student and faculty development programmes.

Mission

"Civilization Through
Technology"

To develop extraordinary technical human resource who can drive India always ahead to keep pace with the development process unleashed by the world technical experts to achieve civilized society of India.

Vision

To develop Godavari College of Engineering as a center of excellence in technology. Where to develop leadership quality, self driven motivated new technical generation of students with right character and good disciplined citizen of India to ensure India to emerge as a most developed nation by 2020, bringing back the ancient glory of India as a creator.

GODAVARI COLLEGE OF ENGINEERING JALGAON

Department Mission and Vision

MISSION

- To develop innovative, competent, efficient disciplined and quality Electrical Engineers.
- To develop innovative, competent, efficient disciplined and quality Electrical Engineers.
- To enrich knowledge and encourage the students to become Entrepreneurs.
- To produce Engineers who can participate in Technical Advancement and Social enlistment of the country and to meet the growing global challenges.
- To prosper in Academic Activities by continual improvement in Teaching methods, Laboratory facilities and Research activities.
- To develop consultancy for various industries.

VISION

- The Electrical Department is to help students to explore recent trend in technology so that the dexterous team of electrical engineers contribute in diversified development of nation.

GODAVARI COLLEGE OF ENGINEERING JALGAON

POs

B. Program Outcomes (POs)

Engineering Graduate will be able to –

1. **Engineering knowledge:** Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.
2. **Problem analysis:** Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.
3. **Design/development of solutions:** Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.
4. **Conduct investigations of complex problems:** Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.
5. **Modern tool usage:** Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.
6. **The engineer and society:** Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.
7. **Environment and sustainability:** Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.
8. **Ethics:** Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.
9. **Individual and team work:** Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.
10. **Communication:** Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.

GODAVARI COLLEGE OF ENGINEERING JALGAON

Question Bank

Subject - Electrical Machines-I

- | | | | |
|------|---|--------|-----|
| 1.a) | What is multiplex winding? | EM/c.I | [2] |
| b) | What is the purpose of laminating the armature? | | [3] |
| c) | Define Back EMF. | | [2] |
| d) | How commutation takes place in DC motor? | | [3] |
| e) | What is the purpose of conducting brake test? | | [2] |
| f) | What are the limitations of field's test? | | [3] |
| g) | What is the effect of variation of supply voltage on iron losses? | | [2] |
| h) | How to minimize hysteresis loss? | | [3] |
| i) | What is an auto transformer? | | [2] |
| j) | Write short notes on open delta connection in case of a 3-phase transformer connection. | | [3] |

- 2.a) Explain the constructional features of DC generator in detail.
b) A 4-pole generator has a wave-wound armature with 722 conductors, and it delivers 100 A on full load. If the brush lead is 8° calculate the armature demagnetizing and cross magnetizing ampere turns per pole. [5+5]

OR

- 3.a) Derive the expression for demagnetizing AT/pole.
b) Draw a developed diagram of 2 layer lap winding for a 4 pole DC generator with 16 coils. [5+5]

- 4.a) Explain the principle of operation of DC motor in detail.
b) A 200 V d.c shunt motor with an armature resistance of 0.3Ω is excited to give constant main field. At full load the motor runs at 600 rpm and takes an armature current of 30 A. If a resistance of 1Ω is placed in the armature circuit, find the speeds at full load torque and double full load torque. [5+5]

OR

- 5.a) With the help of neat sketch, explain the working of 3 point starter.
b) A 200V DC shunt motor runs at 600 rpm when the armature current is 30A. Calculate the speed if the torque is doubled. Given that $R_a = 0.18\Omega$. [5+5]
