He has done M.Tech from VNIT Nagpur on Heat & Power Engineering and BE from Govt. College of Engineering Jalgaon in Mechanical engineering. Post-PhD he joined Intel R&D as research scientist on semiconductor packaging and development of advanced cooling techniques for Intel processors. Now he is working as Sr. Silicon Architect at Google on the development of thermal mitigation policies using Machine Learning for Google processors.

He has received Samsung Innovation Award 2016 on his work on development of innovative coating technique based on phase change material (PCM) and Shell Talent Award 2017 on his novel numerical model for capturing phase change processes which is published in reputed International Journal of Heat and Mass Transfer 2017. He has filed eight Patents and published more than 30 peer-reviewed journal and conference papers.

He is an active member of IEEE Electronic Packaging Society. He has delivered many talks on Semiconductor packaging and thermal technologies at different premier academic institutes and carried out multiple academic-industrial initiatives.

Key Highlights:

Dr. Javed Shaikh highlighted the scope of semi conductor mission of the Govt. of India, the internship opportunities and the start ups. He discussed the challenges on thickness, power dissipation, the component density and so on. He also focused on the testing of the ICs. He also highlighted the importance of FABLABs in India to accomplish the vision of the Prime Minister for Vikasit Bharat@2047. The session was an insightful of manufacturing technologies in Embedded Systems and very large scale integration design. He is now looking after the heating issues that are challenging for the end users also. He suggested that, as there is work in progress for nano meter chips by the power and heat are the two major issue that

should be handled very meticulously. He emphasized the Moore's Law, that is very useful in integrated circuits manufacturing. He also discussed the packaging aspects of the semiconductor integrated circuits.

Question and Answers:

Student and faculty members were in full enthusiasm and were open for questioning session. Many logical and conceptual questions were raised by students like they said what are opinions on future prospects of semiconductor mission India. What are different internship opportunities at Google Incorporation, Intel and other semiconductor giants globally Institute Industry collaboration was part of discussion during the question and answer session. Recent trends in IC manufacturing and C2S were part of the questions asked by faculty members and the interested students.

Report on Program Seminar/Guest Lecture/Special Lecture

Name of Program	APPLICATION OF POWER ELECTRONICS IN ELECTRICAL ENGG 2023
Year	2023-2024
Date:	16 to 20-10-2023
Details of Program	<p>-Power Electronics has penetrated almost all fields. This trend is always ever-increasing, especially with the present trends and tools of new devices and integrated designs of power semiconductor devices and controllers. The study of Power electronics involves the processing of electric power for various uses and also provides a wide range of applications ranging from a few watts to megawatts. The ease of manufacturing has also led to the availability of these devices in a vast range of ratings and gradually has appeared in high voltage.</p> <p>The day is not far when all of the electrical energy in the world will pass through power electronics systems. Power electronics components and systems allow stakeholders to develop more energy-efficient power electronic systems that make important contributions to reducing global energy consumption and emissions. Every day average of 15 billion kilowatts per hour of power which is more than 85 % of power generated is converted or processed by some other power electronic appliances.</p> <p>What is Power Electronics?</p> <p>It comes under the category of electrical engineering which deals with the operations of high voltages (V) and currents (I) to deliver power ($P = V \cdot I$) which supports a variety of global needs. Precise control and efficiency are the main important characteristics of power electronics applications. The study of Power electronics is multidisciplinary and involves semiconductors, control systems, electromagnetic devices, electrical motors, and so on.</p> <p>Applications of Power Electronics</p> <p>The applications of Power electronics range from household electronics to space applications in which these areas all need reliable and continuous electrical power with desired specifications the main thing here to note is Power supply by using power semiconductor that switches and control any mechanisms to any other form by supplying a controlled power it falls under the law of conservation of energy.</p> <p>E-mobility: It is one of the fastest-growing technologies used in fast-charging stations and vehicles at the interface between the battery and the motor. Today vehicle power electronics uses silicon-based semiconductors which contains a maximum of wide band gap semiconductor used to withstand high amount of temperature it can decrease the system cost by decreasing the requirement for complex thermal management systems and it can also regulate the power flow of vehicle.</p> <p>Transformers: In transformers, there are two types such as step-up transformer and step-down transformer which consists of voltage levels in power electronic circuits. They act as energy storage systems. The power transformers are the main components of the isolated DC-DC power converters with high voltage gain. Inverters: This component in power electronics is used to convert DC power to AC power and they are used in</p>

applications such as AC power supplies, UPS, and so on.

Industrial control systems: To improve the control of the speed and torque of electric appliances, it regulates the power supply and improves the systems performance for example rolling mills, cement mills, compressors, textile mills, etc.

Power transmission and its distribution: For to prevent power losses in any areas or parts, Power distribution and transmission are used to regulate voltage levels which improves the system efficiency and operation of overall performance.

Lightning systems: To regulate the voltage levels, control and manipulating brightness, and manage the proper power supply of the lighting systems and their operations.

Energy storing factor: When it comes to energy storage devices such as flywheels, batteries ensure efficient and stable power conversion. It has been the most challenging and most complex issue for electrical industries or any other industrial applications. It helps to reduce capital expenditures when used as a resource in any utility sector.

Renewable source of energy: Power electronics are mainly used in solar panels, wind turbines, and geothermal resources which need power conditioning systems, improve grid integrations and conversions phenomena occur in order to be usable and efficient (user friendly). For example consider solar cells which generate DC power, to obtain AC power here we use power electronic converter is used.

Electronic gadgets: Well if we just look around ourselves we will be surrounded with PCs, mobile phones, regulators, AC, vacuum cleaners, etc ., which are considered as one of the power electronics applications.

Military and Airspace: These areas have been undergoing rigorous research for decades for example power drive controls, landing gear and defensive aids systems (DAS) systems, flight communications and control, avionics, signal systems processing for military radars use processing power electronics which helps to reduce heat and improve the performance and efficiency.

For good performance and size requirements in aircraft and defense advanced semiconductors such as (SiC) silicon carbide are being developed especially for this purpose to meet those requirements.

गोदावरीत टेक्नोव्हेशन २०२३ चे उद्घाटन

जळगाव, (वा.) मुंबई, पुणे यासारख्या विभागांमध्ये प्रचंड टॅलेंट आहे. आयईईईच्या माध्यमातून राज्यभरात दौरे करतांना संपूर्ण महाराष्ट्रातही अशा टॅलेंटचा शोध घेण्यासाठी सात विभाग करण्यात आले. या सात विभागांपैकी उत्तर महाराष्ट्रातही टेक्नोव्हेशन या स्पर्धेचे आयोजन करण्यात आले. प्रकल्प स्पर्धांच्या आयोजनात गोदावरी अभियांत्रिकी महाविद्यालयाने जोरदार सुरुवात केली असून संशोधनात्मक स्पर्धामध्ये गोदावरी 'बेस्ट' असल्याचे प्रतिपादन आयईईई बॉम्बे स्टुडंट सेक्शन कमिटीचे दत्तात्रय सावंत यांनी केले. जळगाव येथे गोदावरी अभियांत्रिकी महाविद्यालयात आयईईई बॉम्बे स्टुडंट सेक्शन अँक्टीव्हिटी कमिटीच्या संयुक्त विद्यमाने टेक्नोव्हेशन २०२३ या प्रकल्प स्पर्धेचे दत्तात्रय सावंत यांच्या हस्ते उद्घाटन करण्यात आले. यावेळी ते बोलत होते. याप्रसंगी व्यासपीठावर गोदावरी फाऊंडेशनचे अध्यक्ष माजी खा. डॉ. उल्हास पाटील, गोदावरी अभियांत्रिकीचे प्राचार्य डॉ. विजयकुमार

अभियांत्रिकी १११ विद्यार्थ्यांचे सादरीकरण

जळगाव, धुळे, नंदुरबार व नाशिक जिल्ह्यातील अभियांत्रिकी महाविद्यालयाच्या अंतिम वर्षातील विद्यार्थ्यांनी सहभाग नोंदविला आहे. यात एकूण ३१ प्रकल्प प्रदर्शनासाठी ठेवण्यात आले असून सुमारे १११ विद्यार्थ्यांनी त्यांचे प्रकल्पांचे प्रदर्शन भरविले. यात गोदावरी अभियांत्रिकी महाविद्यालयातील ११ प्रकल्प आहे. दरम्यान गोदावरी अभियांत्रिकी महाविद्यालयातील टीम ही माझ्या अपेक्षेपेक्षाही सर्वोत्तम काम करीत असल्याचे गौरवोद्गारही डॉ. उल्हास पाटील यांनी व्यक्त केले.

पाटील, अधिष्ठाता व आयईईई स्टुडंट ब्रँचचे समुपदेशक तथा प्रकल्प स्पर्धेचे समन्वयक प्रा. हेमंत इंगळे, डॉ. प्रमोद भिडे, प्रा. दीपक झांबरे, अधिष्ठाता व महाविद्यालय विकास टेक्नोव्हेशन २०२३ चे समन्वयक प्रा. शफीक अंसारी हे उपस्थित होते. दत्तात्रय सावंत पुढे म्हणाले की, विद्यार्थ्यांच्या प्रगतीसाठी हे उत्तम

व्यासपीठ असून या स्पर्धेत विजयी स्पर्धकांना कोपरगावला १५ रोजी होणाऱ्या अंतिम फेरीत सहभागी होता येणार आहे. टेक्नोव्हेशन या स्पर्धेचे गोदावरी च्या टीमने उत्तम आयोजन केल्याचेही त्यांनी सांगितले. यावेळी डॉ. प्रमोद भिडे यांनीही विद्यार्थ्यांना मार्गदर्शन केले. प्रास्ताविक प्राचार्य डॉ. विजयकुमार पाटील यांनी केले.

मास्टरमाइंडची संधी

विद्यार्थ्यांमधील बौद्धिक क्षमता ओळखण्यासाठी आणि त्यांचे कौशल्य सादर करण्यासाठी या स्पर्धेचे आयोजन केले आहे. आयुष्यात तुम्ही स्वतःला कसे सादर करता हे खूप महत्वाचे आहे. प्रत्येकाला एक सिक्स सेन्स असतो. आयडीया असते. या सिक्स सेन्सचा आणि कल्पना शक्तीचा वापर करण्यासाठी हे व्यासपीठ आहे. त्यासाठी सातत्य आणि कठोर परिश्रम हे आवश्यक आहेत. जागतिक व्यक्तीमत्त्व होण्याची ही एक नवीन सुरुवात असून प्रकल्प स्पर्धा ही मास्टर माइंड होण्याची सुवर्णसंधी असल्याचा सल्ला माजी खा. डॉ. उल्हास पाटील यांनी स्पर्धेतील सहभागी विद्यार्थ्यांना दिला.

| About GF's Godavari COE Jalgaon

Godavari College of Engineering (GCOE) was started by Godavari Foundation in 1999 to impart quality education in the field of Engineering & Technology. It is just one of the ventures of Godavari Foundation set up by person with high academic record at behest of very young altruist Dr. Ulhas Patil in 1999 at Jalgaon. College is approved by AICTE, New Delhi, recognized by Directorate of Technical Education (DTE), Govt. of Maharashtra and affiliated to Dr. Babasaheb Ambedkar Technological University (Dr. BATU), Lonere - Raigad (Maharashtra) and *NAAC Accredited*. The courses are conducted in the premises having well infrastructure, Computer Labs, Conference halls, Library and other amenities. A team of experienced and qualified faculty bears the responsibility to impart knowledge to aspiring students in GCOE. Right blends of Industrialists and Academia from various other colleges come to professionally train our students. Interaction with eminent personalities in their respective field is a continuous activity at the GCOE. In addition to giving them value-added skills, college provides the students with a solid foundation base to strengthen their engineering practical knowledge.
